ABSTRACT

This is the report of the second national survey of the member colleges and universities of the National Association of Schools of Public Affairs and Administration (NASPAA). The questionnaire was mailed to all member institutions in fall 1973 and covered the academic year 1972-73. The survey has succeeded in gathering a wide variety of data that should be of interest to prospective students, degree candidates, teachers, and university and governmental administrators. The 108 respondents included represent nearly all of the major academic institutions in the U.S. with graduate programs in public affairs and public administration. Respondents were asked to characterize the type of institution in which the public administration and public affairs graduate programs are being offered. This report is designed chiefly to satisfy the interests of prospective students and other individuals wishing to know what specific programs at particular schools look like and how they compare with each other. The programs are divided by states. (Author/PG)

The National Association of Schools of Public Affairs and Administration consists of 128 schools and programs in the field of public affairs. The Association serves as a national center for information about programs and developments in its field, strives to set goals and advance standards of educational excellence, and represent the concerns and interests of member institutions in the making of national policy for education. NASPAA is a major component of the American Society for Public Administration, a national organization for those interested in improving the public service at all levels of government.

For information concerning NASPAA membership, programs, national conferences, sections and committees, annual survey of public affairs/public administration programs, etc., contact: Don M. Blandin, Staff Director, National Association of Schools of Public Affairs and Administration, Suite 300, 1225 Connecticut Avenue, N.W., Washington, D.C. 20036.

NASPAA Membership Directory, 1973-74 163

Introduction

This is the report of the second national survey of the member colleges and universities of the National Association of Schools of Public Affairs and Administration (NASPAA). The questionnaire was mailed to all member institutions in Fall 1973 and covered the academic year 1972-1973. Though resembling the 1971 questionnaire, this survey eliminated a number of items used previously in order to elicit responses more rapidly and more accurately. Taken together, the surveys reflect a continuation of NASPAA efforts to become a national data respository for its member institutions.

The survey has succeeded in gathering a wide variety of data which should be of considerable interest to prospective students, degree candidates, teachers, and university and government administrators. Some of the information from the survey has already been summarized and cross-tabulated. Only a portion of it is referred to in this introduction. This report is designed chiefly to satisfy the interests of prospective students and other individuals wishing to know what specific programs at particular schools look like and how they compare with each other. Consequently, nearly all of this report is devoted to an individual profile of each school's program.

For each of the 108 schools included, readers will find such information as size and type of school, the nature of the program, degree requirements, etc. A follow-up report using more of the comparative data will be issued by NASPAA at a later date.

Summary Information

The 108 respondents included represent nearly all of the major academic institutions in the United States with graduate programs in public affairs and public administration (PA/A). For purposes of summary analysis, only 101 programs were included, because seven schools reported 1973-74 data instead of the requested 1972-73 data. (Programs do not always total 101 because not all survey questions were answered by all respondents.)

Respondents were asked to characterize the type of institution in which the PA/A program is being offered. The five major types and number of programs are as follows:

Type	Number of Programs
• Separate professional school of PA/A (i.e., reports directly to central university administration in the same or similar manner as a law school)	25
• Separate department of PA/A in large unit (such as a social science division, college of arts and sciences, etc.).	23
• Professional school of PA/A combined with another professional school (i.e., business school).	11
• Department of PA/A combined with another department (i.e., business administration).	6
• PA/A program within a political science department.	36
TOTAL	101

Student enrollment for the academic year 1972-1973 was 6,150 fulltime students (three or more courses per semester) and 6,450 parttime students (less than three courses per semester) for a total of 12,600.

The number of graduate degrees awarded in 1972-1973 was 3,017, including 150 doctoral level and 2,282 professional masters degrees. Minority enrollments represent approximately one-fourth of the total enrollment. The total number of students by minority group during the 1972-1973 academic year was: 995 Blacks; 176 Chicanos; 18 American Indians; 53 Asian Americans; 81 Puerto Ricans; 1,743 women and 443 foreign students (221 minority students were enrolled as doctoral students).

Attempts were made in the survey to determine the interdisciplinary nature of the graduate programs. Respondents were asked to indicate the fields in which PA/A graduate students could take a concentration of four or more courses as part of the degree requirement. A large number of programs which allow students to choose from a variety of field options was reported. Twenty programs allow graduate students to take concentrations in 11 or more areas, and 32 programs allow six to ten areas of concentration.

Nearly three-fourths of the units have 11 or more faculty teaching in the public affairs and public administration programs. Over one-third have 21 or more. Roughly two-thirds of the units reporting have more than five academic fields represented by their faculty. The fields most commonly represented are, in order of frequency: politi-

cal science (86 programs), public administration (80), economics (68), business administration (56), sociology (51), statistics-mathematics (40), law (38), planning (37), and psychology (32).

Another way of eliciting information on the interdisciplinary nature of the programs was in a question which called for the number of academic fields represented by faculty on the teaching unit's policy making body. Two-thirds of the units reporting have three or more disciplines represented: 32 programs claimed six or more academic fields, 36 units listed from three to five fields. These figures indicate a substantial commitment to the interdisciplinary demands of public affairs/public administration education.

The course areas most frequently offered in the graduate programs are: organization theory and behavior (97 programs averaging 4.0 courses per program), public policy analysis (95 programs averaging 3.5 courses per program), urban and intergovernmental administration (92 programs averaging 4.0 courses per program), public finance and budgetary process (92 programs averaging 3.2 courses per program), personnel administration (89 programs averaging 2.8 courses per program), planning (83 programs averaging 2.8 courses per program), planning (83 programs averaging 3.2 courses per program), administrative law (79 programs averaging 2.0 courses per program), and comparative bureaucracy (74 programs averaging 2.0 courses per program). A considerable number of programs reported field specializations in health services administration, environmental administration, recreation administration and criminal justice administration. The most frequently cited core course requirements are: research methodology and data analysis (67 programs), organization theory and behavior (62), introductory/advanced public administration (49), public policy analysis (39) and public finance and budgetary process (37). About one-fourth of the programs reported requirements in personnel management, economics, and American political process. Eighty-six programs offered internships or field experience, with 56 requiring the internship for the masters degree. A total of 2,501 students participated in internship programs during the 1972-73 academic year.

Forty-six schools expect the masters degree to be completed in 12 to 18 months of fulltime study, 17 schools expect completion in 12 months or less, and 31 programs allow from 18 to 24 months duration for normal program completion.

A national survey of this type requires substantial investment of energy from those who develop the questionnaire and then tabulate and interpret it, and from those who take the time to complete the questionnaire. I want to thank the respondents for the care with which they completed the questionnaire. It was the hope of the Committee on Surveys that the questionnaire would help the NASPAA member schools to create comparable data bases. There is some evidence that this is occurring.

Professor A. J. Mackelprang, University of Delaware, and N. Keith Thomas, a graduate student at The American University, did all of the computer work connected with the survey and played a major role in preparing the report. This project could not have been completed without the hundreds of hours they volunteered. The computer facilities of the University of Delaware were used throughout the project. Professor Jerome Hanus of The American University, chairman of the committee for the 1971-1972 national survey, was very helpful in designing the new questionnaire and interpreting the data. Professor Ernest A. Engelbert, University of California, Los Angeles, assisted the Committee in writing the report and relating the work of our Committee to the NASPAA Committee on Standards. Don M. Blandin, Staff Director of NASPAA, played a large part in this project, acting as catalyst, critic, and interpreter of the recent past.

We all share in the hope that this survey will be useful to those concerned with public affairs and public administration education.
